Centre Console Cup Holder
Installation Instructions v1.0

This cup holder holds cups or drink bottles with diameters up to 79mm and includes a customisable spring mechanism. Available in right and left hand drive variants.

Warnings

DO NOT let this product distract you from safely driving your vehicle.

DO NOT use this product to hold liquids of a temperature that could cause injury.

This cup holder is designed as a practical convenience and has proven itself when fitted to test vehicles. However it cannot prevent every possible spillage; Geek of the Road Ltd is not responsible for any collateral damage should a spillage occur.

Note on 3D Printed Parts:

This product is 3D printed; although setup to provide a great finish, minor aesthetic blemishes may be present. Care has been taken to hide seam lines and other print artefacts on the underside and within the cup holes as far as possible.

Installation Instructions

Geek of the Road Ltd accepts no liability for incidental damage caused by improper or careless application of these instructions.

Colour instructions available at www.geekoftheroad.co.uk.

Tools Required:

To install: Crosshead screwdriver

To replace the spring mechanism: 2.5mm hex key

To disassemble: Extra long 2.5mm hex key

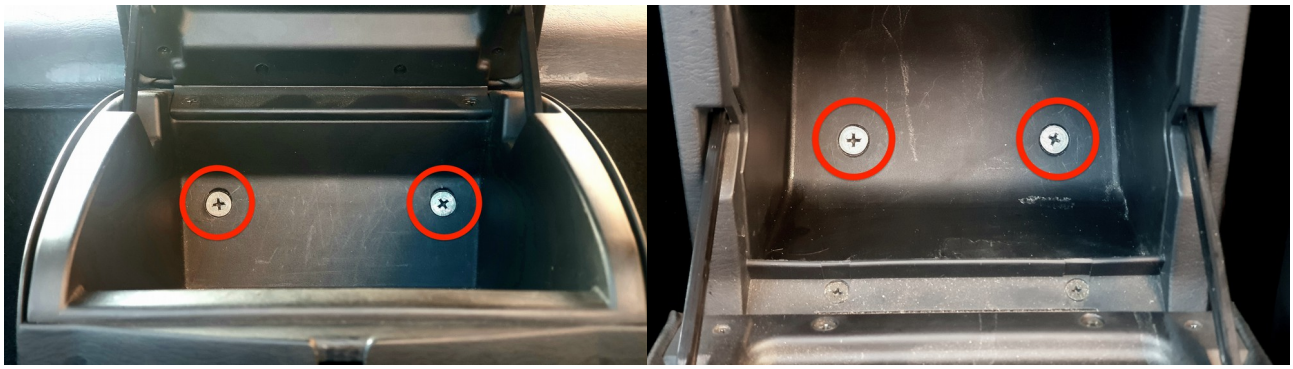
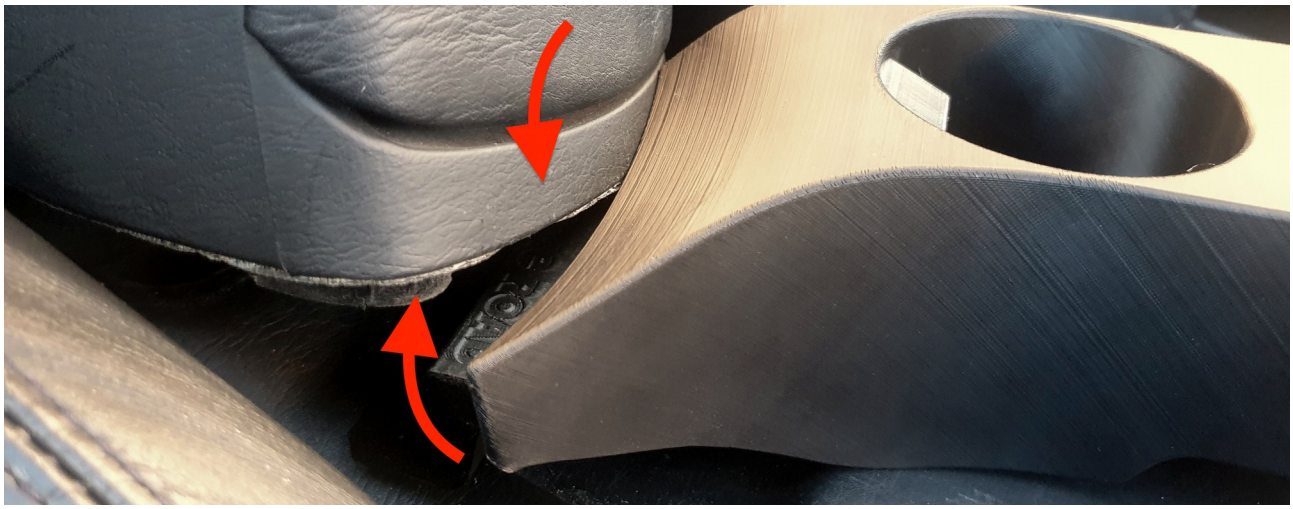
Installation:

1. Remove the four screws holding the centre storage box and lift it off the centre console.



2. Slot the cup holder onto the front of the storage box.



3. Refit the storage box, ensuring the locating tab on the back of the box sits correctly before replacing the four screws.

   When correctly fitted, the cup holder will be held very securely, with a small amount of flex if pulled upwards.

Note: Some bottles have a ridged exterior that can get trapped on the spring mechanism. If this happens DO NOT force the bottle upwards. Release the bottle by pushing it backwards to compress the spring before lifting it out with the spring still compressed.
